Subject: URGENT!! Chubb References

Gents,

We are at a critical point where we need to get references to Chubb pronto. They need to be solid
references where PS has implemented Blaze for an underwriting system. Is there anyway we can use ████████
████████ I seem to recall that we did the work under IBM there. Also it seems that ████████ is not
necessarily a good reference for the fact that we are expensive and if they could replace us with less
expensive people there they would. So are there any others that we could use? We need to get this
resolved ASAP. Thanks.
